

INNOVATION CHALLENGE

BRAZIL-EUROPE

Call for Solutions is Open!

ENRICH in Brazil is calling **European Solution Providers** to propose their COVID-19 related solutions in the areas of **Digitalization, Tourism, Health, and Sustainable Development!**

CHALLENGE 2: HEALTH & DIGITALISATION

Development of a decision support information system for bed and discharge management using telehealth and data science tools. Th system shall be able to provide an analysis of suspected and confirmed cases of COVID-19 in a public federal university hospital linked to the UFPR (Federal University of Parana).

The challenge meets the urgent need to develop technological innovations in healthcare management to contribute to a more organised care for patients with suspicion or patients with COVID-19.

The development of an information system for bed and discharge management through telehealth will contribute for the organisation of the installed capacity in the hospital, then to establish online care of patients in the hospital's outpatient clinics in order to monitor them and manage demand, and also to the management of COVID19 coping strategies, enable a better planning of resources allocation. **More information [here](#).**

- Desired Type of Solutions: product, service, business model, technology, processes
- Application for solutions: <https://forms.gle/4sPrgQ86K6vEmion6>
- Deadline for Application: 9 October 2020 (extended)

The European Network of Research and Innovation Centres and Hubs, Brazil

ENRICH in Brazil is a Non-Profit organisation established in Brazil as a result of a collaboration between European and Brazilian STI Actors. **More info:** www.brazil.enrichcentres.eu
