Mission: The National Service of Industrial Apprenticeship (Senai), which is part of the Fiep System, is a private non-profit education, science, technology and innovation institution, that has more than 50 professional educational units distributed throughout Paraná, as well as 8 Institutes of Technology and Innovation, in the most diverse areas of industrial activity. Education is one of the pillars of Senai, which offers initiation courses, industrial learning, qualification, improvement and technical courses, as well as technological graduation, extension and graduate studies through the Faculties of Industry. The institution also offers online and in-company courses, meeting the specific needs of students and industries. It also offers technical and technological solutions and provides consulting services, industrial laboratory tests and technological support. The institution has the largest private network of integrated laboratories in the country and supports the development of innovation in cooperation with industry.

The mission is to serve and strengthen the industry to improve people's lives. In absolute numbers, the RDBI Ecosystem there are more than 1,000 startups spread all over the state divided by more than 20 verticals, which show the diversity of the innovation environment in Paraná.

An entrepreneurial DNA led by AgroTech, HealthTech and EduTech, but with space for other verticals equally relevant companies such as Fintech, Construtech and BioTech. The Innovation Soft-landing Hub of the Federation of Industries of the State of Paraná, led by the acceleration Program of Fiep System have the mission to connect, transform and strengthen people & business globally through customized, sustainable & great impact solutions.
